

US-2002 User Station

The US-2002 Intercom User Station is designed for stationary use by personnel who may require selective access to two (2) intercom channels. It can be rack mounted or used as a desktop station. For rack mounting, optional hardware is required. For desktop use, four (4) rubber feet are supplied.

Features

- **Balanced Audio Transmission** – Balanced audio transmission system for crisp clean audio even under the most challenging conditions.
- **Remote Mic Kill** – Remote mic kill feature allows users to silence any open mic on the intercom channel.
- **Digi-Latch Technology** – Separate Listen, Call, and Talk buttons with Digi-Latch technology gives users complete control of system communications while maintaining ease of operation.
- **Backlit Buttons** – Backlit buttons with lettering on the button allow users to see which button to push even in darkened room environments.
- **3.5mm Rear Data Connector** – Convenient 3.5mm rear data connector allows the Master Station to be linked with one (1) or more ES-4000A Expansion Stations for access of up to 18 intercom channels.
- **VOX Feature** – VOX (voice activated microphone) feature is on/off programmable via front panel with individual trim pots for headset and front panel microphones.
- **Rack Mountable** – Rack mountable in a variety of modular configurations with one (1) of several optional rack mount kits.
- **Clear-Com Compatible**
