

OPERATING INSTRUCTIONS

LKP-957 MONITOR KEYPANEL

HEADSET/SPEAKER SELECT

To select an optional external headset, tap the HDST key. The key lights when an external headset is selected, and the internal speaker shuts off. To turn off the headset and turn the speaker back on, tap the HDST key again

OPERATING MODE SELECT

The LKP-957 has two operating modes: "ONE" and "MANY". The current operating mode is identified in the mode display below the HDST key. To change operating modes, tap the HDST key twice.

"ONE" MODE

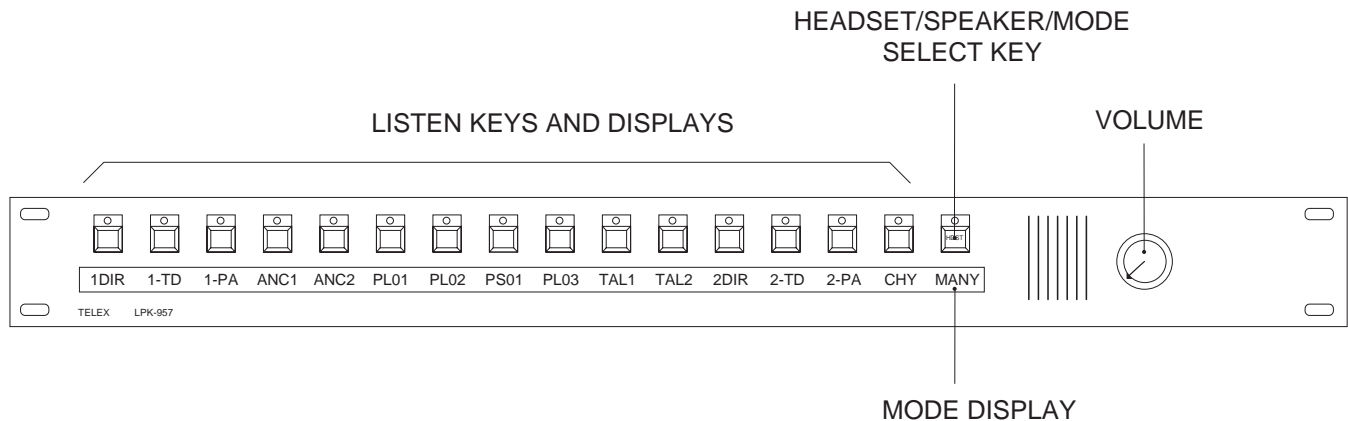

In this mode, only one listen key may be on at a time. Tap the desired listen key to listen to that channel. Tapping another listen key will automatically turn off the previously selected key. Tapping the key that is on will turn that key off.

"MANY" MODE

In this mode, many listen keys may be on at the same time. Tap listen keys as desired to turn listen channels on/off.

Using The ISO Feature In "MANY" Mode

The ISO feature may be used to momentarily deactivate all but one listen key. To use this feature, press and hold the desired listen key. After approximately one second, all other listen keys will shut off. When the listen key is released, all of the previously selected listen keys will turn back on.
