

# VOIP VIRTUAL KEYPANEL QUICK START GUIDE

---

This box contains:

- USB Security Dongle
- VOIP Virtual Keypanel software installation cd.
- VOIP Virtual Keypanel User Manual
- VOIP Virtual Keypanel Quick Start Guide

To install the VKP software, do the following:

1. Connect the USB Security Dongle to your USB port located on the back of your computer.
2. Insert the VOIP Virtual Keypanel Software installation cd into your pc's cd-rom drive.  
*Auto run opens the Installation Wizard \**
3. Complete the Installation Wizard.

\*\*\* If the Autorun function does not start you will have to manually open the installation wizard. To manually open the Installation Wizard, do the following:

1. On your computer desktop, left click on **My Computer**.  
*A popup menu appears.*
2. From the popup menu, select **Explore**.  
*Windows® Explorer appears.*
3. Expand the Compact Disk drive, and then select **VKP**.  
*The VKP folder appears displaying its contents.*
4. Double click **setup.exe**.
5. Complete the Installation Wizard.
